FEEDING DIRECTIONS

Find a spot where deer will be concealed and feel safe from predators. Avoid dawn and dusk when deer are most active as to not startle them. Placing a few steps off a deer trail works well. Remove the plastic and place 1-2 blocks on short grass, dirt, a mineral scrape, or on top of a stump. Once deer find the block, they will frequent the site, so keeping a block in the area will keep deer around all year.
