### FEEDING DIRECTIONS

Stablemate Kaydets are designed to be fed free choice to horses, provided they have not been mineral starved. If animals have not previously been fed mineral free choice, they may over consume. Mineral-starved animals should first be hand fed Stablemate Kaydets, and the daily allowance should be increased gradually until they start leaving a little in the feeder. When this point is reached, free choice feeding can begin.

#### Mix in grain ration or feed free choice at the following rates:

**Idle Mature Horses:** 2 to 3 ounces per head per day.

**Working Horses:** 3 to 4 ounces per head per day.

**Foals, Weanlings and Ponies:** 1 to 2 ounces per head per day.

**Growing Horses:** 2 ounces per head per day.

**Gestating Broodmares:** 3 ounces per head per day.

**Lactating Broodmares:** 4 ounces per head per day.
